HB 2662 FS

Technical Data Sheet

Polypropylene, Homopolymer

Maminal

Product Description

HB 2662 FS is a polypropylene homopolymer used for fiber extrusion.

HB 2662 FS has a very narrow molecular weight distribution and is formulated with an anti-gasfading (AGF) stabilisation package.

Typical application is spunbond nonwovens.

HB 2662 FS is non-phthalate grade. This product is suitable for food contact.

Product Characteristics

Application Filament Yarn. Geotextile & Agriculture. Hygiene Nonwoven.

Processing Method Continuous Filament/Spinning. Spunbond

Market Textile

Features Gas-fading Resistant. High Flow. Very Narrow MWD.

Phthalate-Free

	Nominai		
Typical Properties	Value	Units	Test Method
Physical			
Melt Flow Rate (230°C/2.16kg) Mechanical	26	g/10 min	ISO 1133
Flexural modulus (2 mm/min)	1250	MPa	ISO 178
Tensile modulus (1 mm/min)	1300	MPa	ISO 527
Tensile Strength at Yield (50 mm/min)	33	MPa	ISO 527
Elongation at Yield (50 mm/min) Impact	11	%	ISO 527
Charpy Impact Strenght (Notched, 23°C)	3.0	kJ/m ²	ISO 179
Izod Impact Strenght (Notched, 23°C) Thermal	2.5	kJ/m ²	ISO 180
Vicat Softening Temperature (10N)	152	°C	ISO 306
Heat Deflection Temperature (0.45 MPa)	75	°C	ISO 75B

Notes

These are typical property values not to be construed as specification limits

REACH

Polypropylene are exempted from registration under REACH. However, the corresponding monomers (used as raw materials for polymer production) and relevant additives have been registered. Please see related Declaration of Compliance for Plastic Food Contact Materials (DoC for PFCM).

Packaging

Polypropylene pellets is typically packed in polyethylene bags with net weight of 25kg each. 50 bags are stacked on a flat wooden pallet (dimensions: 1100mm x 1300mm x 150mm) with net weight of 1250kg per pallet that is stretch-hood film wrapped. Upon agreement with a customer PP pellet can be packed into big bag sized for 1000kg on wooden pallet (dimensions: 1140mm x 1140mm x 150mm) without stretch-hood film wrapping.

Storage

Polypropylene bags packed 25kg 1000kg stored product in big bags stacked wooden pallet shall on be enclosed dry place preventing from direct sunlight least from temperature at meter far heaters, at min. -15°C / max. 35°C, relative humidity max. 80%. Prior to processing PP product bags shall be kept in production area for at least 12 hours.

PP shelf life is 36 months from the date of manufacture.
